DTM commission defines the vehicle technology up to the end of the 2015 season 

During its meeting on Wednesday, 04th June, 2014, the DMSB's (German Motor Racing Association) commission responsible for DTM defined further cost-reduction measures for the most popular international touring-car series. The core factor is the freezing of the DTM vehicles' homologation that came into force on 01st March, 2014, up to the end of the 2015 season. Also frozen was the extra homologation for individual components – mainly for the suspension area – that was carried out on 02nd June, 2014. In the case of a joint application of all the three manufacturers involved in DTM – Audi, BMW and Mercedes-Benz – DMSB may adapt the homologation-realisation deadlines. Within the scope of this arrangement, manufacturer Mercedes-Benz will be offered the opportunity to enhance their car within the specifications of the existing technical regulations and contest a day of testing up to 25th September (right before the 9th round of the DTM season).
